Now manufactured in the US, the new 13" EZ Shear for Siding & Siding Trim (SST) is designed specifically for the siding industry. This must-have shear provides a high-quality, durable solution for quick, easy installations. Intended for light, general use, the 13" EZ Shear SST features a new full table for a solid stance and a new handle design for greater leverage.

13"

Item #213SID

FEATURES

- CLEAN** Produces no airborne dust.
- DURABLE** Hardened chromium-vanadium tool steel blade outlasts saw blades 20 to 1.
- STRONG** Beefy new aluminum handle, 20% stronger aircraft-grade aluminum extrusion, and phenolic coated marine-grade table.
- STABLE** New rectangular table shape and full-width tail provide rock-solid stability.
- VERSATILE** 1" opening allows you to cut most fiber cement siding, OSB and siding trim. Sized to cut double-4 and double-5 vinyl siding and cuts 45° angles on 9" siding.
- EFFICIENT** Produces fast, precise factory-quality cuts with one stroke. New simplified camlock for trouble-free operation.

13" EZ SST: Redesigned specifically for fast, easy siding installation.

Precision cutting, including angle cuts. One Shear Blade outlasts multiple sawblades.

No Electricity Needed.

Safer than a powersaw, quiet, and no messy hazardous dust.
